# Wireless Water Tank Level Indicator

## Aquatel S207

Is a very effective way to know just how much water is in your tank. It is the worlds smartest fully wireless domestic Tank Water Level Indicator. It auto-updates to a small and stylish desktop indicator placed in your home.

By simply pressing a button on the interior desktop unit, you see current water level in your tank. Warns of rapid water loss. Aquatel S207 will even tell you when to replace the batteries. Easy installation - can be installed in less than 10 mins.
